

A Gift to the Engineering Industry.....

8 Way Ball valve

8 way ball valves have been designed & developed by **Mevada Engineering Works Pvt.Ltd** .to provide total control under one valve having one bottom inlet & eight outlets by eliminating the no.of valves, pipes, joints & fittings.

Ball valve have been designed & manufactured as per ASTM B 16.34 and BS 5351 and tested as per BS 6755 part I.
Temperature range: -20⁰ C to + 180⁰ C

Construction

- Uni-body, Bolted Cover
- Top Entry & truinion mounted Ball
- Integral Ball & Stem
- Antistatic device
- ISO 5211 mounting pad for Easy Automation
- 1/2" NPT Inject Cleaning Nozzles
- Spring supported seats

Features

- Bubble tight shut-off via Spring loaded seats
- Easy Locking arrangement at every port
- Easy Online Maintenance without disturbing pipeline.
- Avoids maintenance of 8 individual ball valves
- Total Control through 1 valve
- Easy Flushing & Cleaning for batch / product change
- Easy operation due to truinion mounted ball & spring loaded seats.

Range :

Size : 1" to 4"

Rating : 150# & 300#

Seat : Reinforced PTFE

Operation : Gear operated by default & Motorised as optional
